DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.

Election/Restrictions

3. This application contains claims directed to at least the following patentably distinct species:

Species I, drawn to *a touch panel comprising a panel layer for outputting a corresponding touch signal to a processor when pressed, wherein the panel layer is installed between an electromagnetic apparatus and a plurality of display units [as described in figure 5 and at paragraph 29, lines 1-3 of the instant specification, for instance]; and*

Art Unit: 2629

Species II, drawn to *a touch panel comprising a panel layer for outputting a corresponding touch signal to a processor when pressed, wherein the panel layer is installed above a plurality of display units* [as described at paragraph 29, lines 3-7 of the instant specification, for instance].

Wherein both **Species I** and **II** are directed to at least the following patentably distinct sub-species:

Sub-Species A, drawn to *a capacitive panel layer* [as described at paragraph 28 of the instant specification, for instance]; and

Sub-Species B, drawn to *a resistive panel layer* [as described at paragraph 23 of the instant specification, for instance].

The species are respectively independent or distinct because the species do not overlap in scope, i.e., are mutually exclusive; the species are not obvious variants; and the species have a materially different design, mode of operation, function, and effect.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species (and sub-species) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4 and 9-18 appear to be generic to the aforementioned species.

Art Unit: 2629

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. Applicants are advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 2629

Should applicants traverse on the ground that the inventions or species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2629
